

Project Plan personal portfolio:

Week 9: Start Coding

- Begin programming the site using HTML, CSS.
- Build the basic structure for the homepage and navigation bar.
- Add placeholder content and test basic functionality.

Week 10-12: Refinement and Second Version

- Apply feedback from the first version:
 - Remove the drop-down menu and replace it with a simpler navigation system.
 - Update the layout to look more modern and ensure the text is easier to read.
 - Resize images and add effects like blur to improve balance.
 - Replace social media links with icons and make sure they are clickable.
- Fix the site's resolution and ensure it works well on both desktop and mobile.
- Add links to my social media profiles.

Week 13-16: Final Touches and Additional Pages

- Create separate pages for each learning outcome (structure and design these pages to look consistent with the homepage).
- Add detailed descriptions of each learning outcome and relevant examples.
